👤 ABOUT ME

Full-stack Web Developer with a passion for creativity. I love and enjoy the process and creativity that comes with building websites and apps. I am a graduate of The University of Sydney and Trilogy's Full-Stack Coding Bootcamp. During this course, I have acquired all necessary skills to build a full-stack website with technologies such as React, MongoDB, GraphQL, Express.js and many more listed below. This proves to show that I am the perfect candidate for this position.

I have had experience in building a website from scratch with other fellow web developers, so I understand the process and possess mindset behind building something from the bottom up as a team. I have also built a MERN stack web application alone so I can further understand the process of being independent and relying on myself to achieve and accomplish what is needed to be done within a time limit. What sets me apart from other candidates is that I have an independent, goal-driven mindset which keeps me determined to achieve what needs to be done.
