👤 ABOUT ME

Hello World! I love and enjoy the process and creativity that comes with building websites and apps. I am a graduate of The University of Sydney and Trilogy's Full-Stack Coding Bootcamp. During this course, I have acquired all necessary skills to build a full-stack website with technologies such as React, MongoDB, GraphQL, Express.js and many more listed below. I have had experience in building a website from scratch with other fellow web developers, so I understand the process and mindset behind building something from the bottom up as a team. I have also built a MERN stack web application alone so I can further understand the process of being independent and relying on myself to achieve and accomplish what is needed to be done within a time limit. Please take some time to view my grades here.

📕 BIO

Birth Date
30th April 2003

Nationality
Australian

Location
Sydney, NSW

🧠 TECHNICAL SKILLS

- GraphQL
- MongoDB
- Mongoose
- SASS
- Node.js
- MySql
- Sequelize
- Express.js
- Handlebars
- JavaScript (jQuery.js, moment.js)
- CSS
- Bootstrap
- HTML

🧠 SOFT SKILLS

- Time Management
- Innovative
- Problem Solver
- Collaborative
- Communication

COMPLETED PROJECTS

Sport Spot

Sport Spot is sports application that allows users to find information such as results, summaries and highlights of all sports in a matter of seconds. What makes Sport Spot stand out is large variety of sports, from Football, to Basketball, to Chess, to Esports. To understand more of this application please visit the > GitHub Repository < or click the link below to view the deployed application.

https://github.com/LamekMarouf/the-sport-spot

ARK

Act of Random Kindness (ARK) is an application that allows users to post requests for help, and other fellow users can view these requests, and decide whether they would like to assist them. To understand more of this application please visit the > GitHub repository < or click the link below to see the deployed application.
